- **Databases:** PostgreSQL, MySQL, Oracle, SQL Server, MongoDB, Elasticsearch
- **Messaging & Cache:** Redis, Sidekiq, Kafka, AWS SQS, RabbitMQ
- **Testing & CI:** RSpec, Capybara, TDD, GitLab CI, CircleCI, Codeship, Semaphore, Jenkins, GitHub Actions
- **APIs & Integrations:** REST, GraphQL, SOAP, Pusher
- **Infrastructure:** Kubernetes, AWS, Google GCP, Docker
- **Frontend:** HTML/ERB, CSS/Sass, Bootstrap, Semantic UI, jQuery
- **Methodologies:** Agile, Scrum, Kanban
- **Operating systems:** macOS, Linux, Windows

Work Experience

Software Engineer — Bryj · January 2024 - present

- Kicked off the **Beam Studio** project, which turns websites into iOS/Android mobile apps in minutes.
- Work on the architecture, maintenance and development of new backend features to streamline product operations.
- Replaced Bitrise with GitHub Actions scripts for the iOS (.ipa) and Android (.apk) builds, **reducing company costs**.

Software Engineer — RealFevr · November 2022 - December 2023

- Worked on the **Web3** ecosystem on a platform of licensed sports digital collectible NFTs.
- Developed the company's marketplace Referral program, communicating via API with an external tool to grow and engage customers.
- Refactored critical legacy code, **improving performance and maintainability** of the application.

Software Engineer — iCapital · May 2022 - October 2022

- Developed features in Ruby on Rails and React.js for the **Fund Finance** team, focused on financial transaction processing (fintech).
- Worked from the Portugal office of a US-based company, integrated into an internationally distributed team.
- Optimized parts of the existing codebase, contributing to performance improvements.

Software Engineer — Nearshore / Voith · April 2021 - April 2022

- Worked on the learning platform management division (**Drive4YOU**) of Voith, allocated through Nearshore Portugal.
- Developed new features and code adaptations to serve multiple clients of the Voith group.
- Maintained the platform instances on **AWS**, ensuring continuous availability for clients.

Software Engineer — Sysmatch / Glintt · March 2020 - April 2021

- Worked on the campaign management system for **Sifarma Saúde**, serving ANF (the Portuguese National Pharmacy Association).
- Worked on multi-channel notifications (**SMS, e-mail and push**) to partner clients.
- Maintained integrations between the system and other platforms in the Glintt group.

Software Engineer — Neo Med · June 2019 - March 2020 (part-time until April 2023)

- Developed new features in the **Marketplace** and **SaaS** for medical reports, shortening the distance between symptoms and patient.
- Built a **Gateway** with REST API and SOAP Client for communication with partner clients.
- Continued contributing to the product part-time between March/2020 and April/2023.

Backend Developer — Codeminer42 · April 2016 - June 2019

- Worked as a backend consultant on multiple client projects, from greenfield development to legacy system maintenance.
- Operated across diverse domains — **fintech, e-commerce, cryptocurrency, healthcare, hospitality, gaming and investments** — adapting quickly to each context.
- Contributed to Codeminer42's own open source product (**Central CM42**, a backlog management system).

Clients served: StartsPremium, Guide Investimentos, Omnitrade, Nexaas, Smart Fit / Bio Ritmo, Achieve Leap, Hospedin, Riot Games.

Backend Developer — PROTESTE Brasil · November 2013 - March 2016

- Joined the API development and integration team at PROTESTE, a Belgian-origin company focused on quality, metrology and technology for associates and clients.

Co-founder / Developer — Cotar Agora · August 2013 - August 2014

- Co-founded and developed an online price quotation software with my business partner, designed to **save costs** on the purchase of products and materials.

Backend Developer — Centro Universitário Claretiano · November 2010 - June 2013

- Developed modules for the candidate selection process, exam administration and student management for a university with multiple branches across Brazil.

ERP Developer — Jumil · February 2003 - October 2010

- Worked as an ERP developer (Senior Sistemas / LSP) at an agricultural implements company — **first professional experience** in software development.

Education

Bachelor of Information Systems — Centro Universitário Claretiano · 2006 - 2009
